Professional Summary:

I have been working as a software developer for about two years. My most recent experience involved developing web applications using Ruby on Rails and JavaScript (with jQuery), participating in project discovery phases, and applying software engineering principles. I am currently open to new challenges and technologies.

I have worked on the development and maintenance of high-availability web applications, combining architectural best practices, database integration, query optimization, and the development of new features. I have practical experience in production environments with high user volumes, including monitoring, debugging, asynchronous processing with Sidekiq, and integration with external services.

Driven by a desire to understand web systems end-to-end, my career path spans both backend and frontend development, as well as experience in DevSecOps and cloud computing. This gives me a comprehensive view of the application lifecycle, from infrastructure and CI/CD to UX and code quality. I hold an AWS certification, have advanced English proficiency, and earned a degree in Systems Analysis and Development from IFPR.

I am looking to join teams that value software quality, innovation, autonomy, and continuous learning, always focusing on delivering real impact through well-structured, secure, and scalable technological solutions.

Education:

Technologist in Systems Analysis and Development – *In Progress* – Federal Institute of Paraná (IFPR) – Cascavel, Brazil

Technical Skills:

Programming languages: Java, Python, Ruby, HTML5, CSS, SCSS, Javascript.

Frameworks: Rails, React-Native.

Tools: AWS, Github, Visual Studio Code, RubyMine.

Databases: PostgreSQL, MySQL.

Languages: English – Advanced (C1, PEL – Unioeste).

Certifications:

AWS Certified Cloud Practitioner – valid until 2026

Professional Experience:

Software Developer – Ruby on Rails – Santé Sistemas – Mar/2025 • Present

- Maintain and enhance a Ruby on Rails web system used by 1,500+ B2B clients.
- Optimize PostgreSQL queries for performance and scalability.
- Work full-stack in project discovery, feature development, and code reviews.
- Implement and monitor asynchronous workflows using Sidekiq.
- Execute secure and reliable data import routines.
- Monitor logs and external integrations using Discord webhooks.

Frontend Intern – React Native– Compass.UOL – Jul/2023 to Dec/2023 (fixed-term contract)

- Completed guided training focused on frontend development with React Native.
- Delivered three hands-on projects applying modern mobile development practices.
- Participated in agile methodologies and collaborated with a multidisciplinary team.

DevSecOps Intern – AWS & Cloud – Compass.UOL – Oct/2024 to Mar/2025 (fixed-term contract)

- Developed skills in Linux, Docker, Kubernetes, and AWS cloud services.
- Completed practical infrastructure challenges in cloud environments.
- Applied Scrum methodology in daily activities.
